### CoffeeSafe in the Community

We are very proud to help support some fantastic trusts, charitable events and the local community.

The team at CoffeeSafe are pleased to be involved with various incentives to support our community, this comes in the form of a "Christmas Toy Drive", sponsoring the local kids football team at "Clifton Rangers YFC", an ongoing relationship with "Wyke Food Bank" and through the "CoffeeSafe Fund".

"The CoffeeSafe Fund" is an initiative setup to provide funded activity programmes for children who have limited opportunities to enable them to attend Huddersfield Giants Community Trust's holiday camps.

Research shows that school holidays can create barriers and pressure points for children and families, this can create unhealthy lifestyle choices both physically and socially.

The CoffeeSafe team feel strongly that opportunities to be involved in sport and socialising should be available to all children, to allow them to spark those sporting interests, get active and begin new friendships that can go on to form genuine long term rewarding and positive experiences.

Throughout the summer holidays 100 fully funded places have been provided, these places will enable children to receive a healthy meal and partake in all their favourite sports, which will help reduce social isolation, keep them active and create a positive focus.

## Think **Safety** First

# L.E.A Coffee Machine Safety Discussion and PSSR Awareness Training

We are pleased to be continuing with our coffee machine and PSSR 2000 awareness raising safety presentations and training sessions, over the last few weeks we have visited and delivered these at Wakefield, Calderdale and Coventry City Councils.

Their environmental health teams welcomed the opportunity to discuss coffee machine safety in the hospitality sector, sharing experiences and knowledge is a great way to become more proactive in raising awareness and providing competent advice to the duty holders.

A big thank you to those that took part in these interesting discussions on this often overlooked area, these types of debates of responsibilities and legal requirements placed on coffee machine users and owners will help to maintain safety in the ever growing coffee culture sector in the UK.

## Audits with CoffeeSafe

Quality assurance audits carried out with CoffeeSafe ensure coffee machine pressure system examinations are carried out in an objective, thorough and professional manner.

These audits are a great opportunity to share best practice, knowledge and promote high quality safety assessments.
