Primary Authority Partnership

CoffeeSafe welcomed Julian and Ella from West Northamptonshire Council to CoffeeSafe head offices as part of our Primary Authority Partnership.

It was great to meet up again and benefit from their knowledge and experiences working within the enforcing authorities whilst reviewing the progress made and consider further ways to advance the partnership.

Importantly it also provided an opportunity to demonstrate and discuss our newly developed bespoke software platform TheCafe.Cloud. A key feature of this new software is to facilitate compliance checks to be carried out efficiently and therefore increase enforcement of commercially sited coffee machines in scope of the Pressure Systems Safety Regulations 2000 (PSSR).

We are continuing to provide PSSR awareness training courses to environmental health teams within Councils throughout the UK and we are pleased to say that following these interactive training sessions we have already seen positive early signs of an increase in compliance in the regions represented by the officers.

In the coming months we hope to continue making more strides forward as we believe this partnership will greatly assist us to drive our aim of improving safety, raising standards and promoting PSSR awareness and compliance throughout the coffee industry.

L.E.A Coffee Machine Safety Discussion and PSSR Awareness Training

We are pleased to be continuing with our coffee machine and PSSR 2000 awareness raising safety presentations and training sessions, over the last few weeks we have visited and delivered these to environmental officers representing councils including - Cambridge, Peterborough City, Fenland, West Norfolk, Huntingdonshire, Babergh and Great Yarmouth.

They welcomed the opportunity to discuss coffee machine safety in the hospitality sector, sharing experiences and knowledge is a great way to become more proactive in raising awareness and providing competent advice to the duty holders.

A big thank you to those that took part in these interesting discussions on this often overlooked area, these types of debates of responsibilities and legal requirements placed on coffee machine users and owners will help to maintain safety in the ever growing coffee culture sector in the UK.

Audits with CoffeeSafe

Quality assurance audits carried out with CoffeeSafe ensure coffee machine pressure system examinations are carried out in an objective, thorough and professional manner.

These audits are a great opportunity to share best practice, knowledge and promote high quality safety assessments.
