Delivering Specialised Expertise for Coffee Machine Safety

For many years, we've operated as a specialised health and safety organisation specifically focused on the demands of the coffee industry. We've built a truly unparalleled level of expertise by directly collaborating with a diverse range of stakeholders – from coffee machine manufacturers and engineers to technical managers, end-users, and the local enforcing authorities.

This unique position has given us a distinctive understanding – a genuine insight – into the specific operational challenges, regulatory requirements, and the individual needs of everyone involved in the coffee industry. We've witnessed firsthand the hurdles faced in ensuring compliance and maintaining a robust safety culture.

Introducing TheCafe.Cloud: A Technological Solution for Coffee Machine Safety

That's the foundation upon which we've built TheCafe.Cloud – a cutting-edge, cloud-based software platform designed to revolutionise how the coffee industry approaches safety and compliance.

Key Features Designed for Efficiency and Compliance:

National Machine Register: At the core of TheCafe.Cloud is our comprehensive national register of commercial coffee machines. Each machine is uniquely identified through a durable, clearly marked registration plate – instantly linking to a complete and easily accessible history of its compliance records. This provides unparalleled transparency and accountability to strengthen robust oversight.

Detailed Technical Database: TheCafe.Cloud houses a valuable technical database, offering vital information related to machine specifications and potential technical issues.

Intelligent Scheduling Calendar: Our scheduling calendar streamlines engineering appointments and ensures that critical safety checks are performed on time.

Provider Directory: Easily connect with qualified service providers and engineers in your area.

End-User App: A dedicated app empowers end-users to quickly access compliance data, submit enquiries, and contribute to a culture of safety.

Ongoing Development: We're constantly innovating! Several exciting new features are currently under development, designed to continually enhance TheCafe.Cloud's capabilities.

The Future of Coffee Machine Safety

TheCafe.Cloud is quickly gaining recognition across the industry for its pivotal role in establishing a technologically-driven approach to safety. By integrating innovative solutions and empowering organisations to proactively manage risk, we're facilitating a tangible move toward a safer, more efficient, and more resilient coffee industry.

Think **Safety** First

L.E.A Coffee Machine Safety Discussion and PSSR Awareness Training

In February we had the privilege to take up a presentation opportunity at Lancaster Council as part of a Lancashire Environmental Health Day. This was an ideal setting to reach a wider audience and raise awareness on coffee machine safety and in particular their legal requirements to the Pressure System Safety Regulations (PSSR).

Continuing over the last few weeks we have also met with and presented to officers representing councils including - Winchester, North West Leicestershire, New Forest, Test Valley and East Hampshire.

They welcomed the opportunity to discuss coffee machine safety in the hospitality sector, sharing experiences and knowledge is a great way to become more proactive in raising awareness and providing competent advice to the duty holders.

A big thank you to all those that took part in these interesting discussions, these types of debates of responsibilities and legal requirements placed on coffee machine users and owners will help to maintain safety in the ever growing coffee culture sector in the UK.

Safety Audits with CoffeeSafe

Quality assurance safety audits carried out with CoffeeSafe ensure coffee machine pressure system examinations are carried out in an objective, thorough and professional manner.

These audits are a great opportunity to share best practice, knowledge and promote high quality safety assessments.
